

What to expect when hiring CLS for a hassle-free lawn

Central Landscaping Services

Are you looking for a better idea of what to expect when installing artificial grass in your garden?

Whether you're currently having drainage issues, or you're just looking for a year-round low-maintenance solution that's both child and pet-friendly (not to mention within budget), you've probably realised by now that artificial grass is a good option for you.

Here at CLS, we understand that every job is different, and with over eight years' experience of installing high-quality artificial grass in properties across central Scotland, we've got your back.

By reading this guide, you'll learn:

- **How CLS can help with your project**
- **An overview of all the services we offer**
- **A step-by-step look at our process (from the moment you get in touch with us, to the completion of your artificial lawn, and aftercare)**
- **The next steps to gaining a low-maintenance garden**

How CLS can help

We specialise in helping homeowners install long-lasting, durable artificial grass, and we're here to help you at every stage of your journey, with our own experienced in-house installers to ensure a consistent level of professionalism every time (we never use 3rd party sub-contractors).

From your initial query, we'll help you decide if artificial grass is really your best option, and provide expert advice on the type of grass that would best suit your property, right through to getting your garden exactly the way you want it with grass that looks stunning all year round.

We provide the highest level of support to our customers, and we're always just a phone call away if they ever need support or advice.

Our services

At CLS, some of the main services we offer our clients include:

- **Sourcing and installation of artificial grass**
- **Annual maintenance of artificial grass**
- **Bespoke driveway and patio installations**
- **Tailored solutions**

Below, you'll find a little more detail about each service we provide - that way, you can consider which of these options best suits you, or whether you'd prefer a combination of these services tailored to suit your own project (more about that later).

Sourcing and installation of artificial grass

We supply and fit award-winning artificial grass to homes all over central Scotland. We only fit Easigrass for our customers, because we believe its quality is unmatched by any other brand in the European market - having won several awards at the Royal Chelsea Flower Show.

We are official partners of the brand, and own the rights to the East of Scotland, making us the only company to fit Easigrass in the area.

We carry out all of our installations to a very high standard, which in turn means we can guarantee the installation for eight years. The product itself is also backed up by an 8-year manufacturer's guarantee, and should be expected to last between 15 - 20 years in your garden.

Annual maintenance of artificial grass

Just like your car needs its annual service, we provide quality aftercare to ensure your grass stays in tip-top condition and truly lasts the distance. During an annual service, we'll:

- Powerblow the area to get rid of unwanted leaves, twigs or any other debris on the surface. This will allow us to see the condition of the grass clearly.
- Check all the glued seam joints, and outer retaining edge detail.
- Re-apply the kiln-dried sand which keeps the grass standing pert - this also aids with draining and keeping the grass weighed down.
- Brush the sand deep into the pile, before mechanically brushing in order to raise the pile and remove surface sand.
- Powerblow the surface and existing area outwith the grass to ensure it's clear of debris
- Finally, apply a water-based, environmentally-friendly weed killer (safe for pets and children) over the surface to stop the growth of surface weeds caused by airborne seeds

This will keep your grass looking great for the next 12 months until your next visit.

Bespoke driveway and patio installations

CLS is also proud to be included in the Marshalls register, as part of a national network of highly skilled, reputable driveway and patio specialists. We provide bespoke driveway and patio installations, using a wide range of products including natural stone, granite and resin.

We work in accordance with UK building regulations and SUDS, and all of our driveways and patios come with installation and manufacturer-backed guarantees - some lasting up to 15 years.

Tailored solutions

If you're looking to have artificial grass installed with a patio, or a whole-garden solution that also includes a driveway (or any combination of our services), we can offer you a tailored package to fit your exact needs.

We'll give you guidance on cost, installation, longevity, usage and maintenance to ensure your grass, patio or driveway stays in the best condition.

What to expect from CLS: a step-by-step process

Below, we've outlined exactly what you can expect from the moment you get in touch with CLS, to the installation of your new artificial lawn.

1. Booking a visit

From the moment you get in touch with us, we'll call you back the same day to arrange a suitable time to visit you at your property. (Quote requests outwith working hours will be handled the next day).

Our professional in-house installers will then be able to visit you and measure up your garden. Whilst there, they'll listen to your needs, and advise you on the best range of grass, driveway or patio products for the job.

2. Getting a no-obligation quote

If the job is relatively straightforward, we'll be able to provide you with a fixed price verbal quotation on the spot (with no obligation to buy). If there is other work involved, we may need to price up extra materials and get back to you with an exact cost.

All quotations will be confirmed via email. Our quotation form will outline full details of the service we'll be providing, the grass/patio range being used, the day and time we'll commence work on the project, a fixed price for the work to be carried out, and details of your required deposit.

3. Booking your installation

Once you decide to go ahead with the work, we'll take a 50% deposit as standard in order to secure your booking, and we will then be able to confirm your installation date.

In the week leading up to your installation, we'll also be in touch to let you know when all the materials will be arriving, and what time you can expect us to arrive on the day.

What to expect from CLS: a step-by-step process

4. Completing the installation

We will arrive on time to carry out the work on the day of the installation. We pride ourselves in carrying out all our jobs on time and within budget, and we'll leave your garden looking neat and tidy.

Once you're happy with the result, we'll arrange to take the remaining 50% balance of payment.

5. Quality aftercare

We'll issue you with an 8-year warranty to cover your artificial grass and installation, or up to a 15-year warranty for your driveway or patio. We'll also send you a £50 recommend a friend voucher (redeemable upon completion of any work the friend commissions from us).

You'll also receive a pdf file containing some important 'Dos and Donts' on the usage and maintenance of your new lawn and/or other products. (This includes things such as: Don't have any fires directly on top of your grass, as it may melt due to excessive heat).

6. Arranging your annual service

We'll arrange to get back in touch with you in one year's time to carry out your annual maintenance programme. This service is completely optional, however we do recommend it as we have specialist equipment that gets your lawn looking freshly installed again.

The next step

If you want to find out more about what CLS can do for you, we recommend getting in touch with us either by our contact us form, telephone or email.

One of our friendly team will be able to advise you on the best way to go about gaining information on any of our products, or obtaining a fixed price quote for your low-maintenance garden.

We look forward to hearing from you.
